

Contact App

Idea specification :

The main idea is to make managing contacts more easy and practical.

As by manipulating this application, it provides a well organisation and many features with a simple use.

Main Features :

By using this App , it becomes more easy to organize contact's specifications (name, email and phone number) and we can add whatever new contacts to our list with the possibility of editing or deleting them with just a click and everything is done .

Moreover, the user will get a message in every time an action is done , naming the case of a web user adding a new contact he will get this confirmation « *Contact added successfully* » or when adding a new one with a used email he will get this warning « *This email already exists !* » .
